

ROSE HILL & PINE CLIFF PARKS

Frederick, MD

WBCM prepared a full boundary and topographic survey for each park. In addition, for Rose Hill Park, WBCM prepared contract documents for this reconstruction of the park entrance road to allow better access for buses and expanded the parking lot to accommodate two full buses in addition to expanding the available car parking capacities. Approximately eight parking spaces were added near the north side of the maintenance building. Generally, the service drive was regarded to alleviate drainage problems. At Pine Cliff Park, WBCM provided contract documents replacing six picnic shelters with expansion of parking capacities in the area of each shelter. All shelters were made ADA compliant.
